CHAIRMAN FRICK HAS THE KEY TO IT.

HOMESTRAD, Pa., July 13.—Henry Clay Frick, chairman of the Carnegie Steel Company, is now in possession of the key to the situa-tion at Homestead. Today or tomorrow he may insert it in the lock, and unless the wards have been secretly lubricated there will be a squeaking and creaking which may grate upon the public ear, and perhaps be so noisy as to disturb the public peace. Gen. Snowden and 6,000 other members of the Pennsylvania National Guard are here to see that no one blows dust into the keyhole or in any other way interferes with Mr. Frick's legitimate but un pular intentions, yet the possibilities of serious trouble can hardly be said to have decreased. The strikers are overswed by the large military force, but another twentyfour hours of such diplomatic endeavor as has been operating since the troops came in will encourage the mill workers to desperate deeds.

As soon as the soldiers arrived the advisory committee of the Amalgamated Association and a number of other strikers who do not hold office proceeded to make things pleasant for a large number of the blue coats. They took them into the saloons and restaurants, treated them to cigars and in a hundred ways did their utmost to create a mutually friendly feeling.

A large proportion of the soldiers naturally sympathize with the strikers. Hundreds of the men in uniform are mill workers and coal miners and they are decidedly opposed to assisting in any movement which could be construed into favoring the Carnegie Company. They have said so. Within an hour's limit

yesterday I overheard nineteen militiamen de clare they would desert rather than guard the mills against the strikers or act as cecort for non-union men. So thorough has been the missionary work among the troops that today the strikers are feeling quite jubilant and the fictitious confidence may lead some of the more enthusiastic and impressionable strikers to premature dem-onstration against the non-union workmen who are expected here within a few hours. Personally, however, I feel certain that no

strikers will raise a hand against any one while the army is on the hill. One of the Amalgamation leaders, a man who came from Scotland on a contract with Carnegie and who, when at work, earns \$18 a day, assured me that the entrance of scab workmen would not be resented just now, and that even the introducbeen ordered to the receiving ship Franklin. tion of Pinkerton watchmen would cause Lieut. F. H. Sherman detached from duty in charge of the branch hydrographic office at Savannah, Ga., and ordered to the Thetis.

"We shall endeavor to preserve the best of order," said he, "so long as all these soldiers are here. Black sheep will, of course, be sent in and the works are to be opened up immefatigued. He says that Mrs. Harrison was steadily improving when he left Loon lake and that there is every reason to believe she will now regain her strength rapidly and soon be on the road to entire recovery.

diately, but we shall remain as quiet as possible. If there are no disturbances here within a few days the militia will move out and then God help the 'black sheep.' In less than five minutes two of these brainy strikers came within an inch of convincing me that their action was in perfect accord with the provisions of the Constitution of the United States. Such specious reasoning as they indulged in would win applause from any audience not wholly composed of capitalists.

The exciting and exasperating elements are more numerous and irritating than they have been for a week past. Take away such men as O'Donnell and Grim, Lynch and Crawford and organization is gone, to be succeeded by a mob; an intelligent mob if you dissect its component parts, but without the captains it would be a howling rabble in an hour, ready and anxious to engage in mortal combat with the army on the hills or with any other force the law or the
